

Drum Clamps

Drum Clamp - Forklifts are meant to handle lifting, storing and moving pallets. For businesses that deal with products in drums, you must make use of an attachment to be able to store, move and lift them. There are numerous drum forklift accessories that you can obtain for all your drum moving, lifting and storing requirements. These attachments are specially meant in order to handle drum containers - thus there is no risk of damage to the item or drum container when they are lifted, stored or moved.

Drum Positioner And Grab

The drum positioner is available in three or four tine models. They are operational for the unloading and loading of drums off drum stands, racks and vehicles. This particular accessory is totally automatic, therefore enabling the individual operating it to operate all from the comfort of the lift truck seat. Able to move steel, large and extra large plastic drums, its capacity is 210 liters. This attachment is intended for drum pyramid stacking.

The drum grab can be mounted to the forks, with a designed purpose of handling steel drums which have rolling hoops. Although the initial purpose for the design was to handle steel drums with rolling hoops, the drum grab could help accommodate plastic drums too. Drum capacity maximum is 220 liters for plastic barrels and 210 for steel drums with rolling hoops.

The Rotator

The drum rotator is one more forklift attachment which mounts onto the blades themselves. Their objective is to be able to lift the drum and turn it upside down. The drum is clamped into the drum rotator with a clamp that fits around the center of the drum. The rotation is executed by either a continuous loop chain or a crank handle. The crank handle is utilized for operations that occur beneath shoulder level. For operations which should occur higher than shoulder level, the continual loop chain will be utilized.

Drum tines are simple fork mounted accessory that can be meant for unstacking or stacking 210-liter metal drums. Stacking involves nothing elaborate, only simple horizontal placement of the drums. The carriage-mounted attachments reduce the load center of the drums.

Automatic Tongs

Drum tongs are available both automatic and semi-automatic models which can be utilized in the tight head and open topped metal drum kinds. The drum tongs can likewise be connected several various ways to the lift truck. One way is to connect them beneath a fork-mounted hook. One more way is to attach them to a carriage mounted jib or a fork-mounted jib. Either the semi automatic and the automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the one operating it to ever leave the seat of the lift truck.

Rim Grip Handler

When drums need storage with limited area available, the Rim Grip Drum Handler is the ideal alternative in drum forklift accessories. This particular attachment will work for both the two hundred ten liter drums along with one hundred twenty liter drums. The Rim Grip Handler functions by utilizing steel jaws to grab the rim of the drum. It picks the drum up and puts it down without requiring any room between all of the drums. The typical unit in the business is a zinc-plated handler, even though, this accessory comes accessible in stainless steel for the food and drink industry.
