

## Pulp Clamps

Pulp Clamps - There are actually a lot of other lift truck attachments which can be utilized to make lift trucks much more helpful. Snowplow attachments could be mounted onto the front part of a forklift. A scoop bucket can be useful when the task requires moving gravel, snow, sand, or soil. A double block handler permits the person operating the forklift to lift\carry two loads and pile them beside each other. A lot of those accessories are extremely great for light to medium tasks.

One more lift truck attachment is the package lift clamp, which can lift and transfer really heavy pallets. In addition, pallet crane forks could be utilized so as to lift and transfer pallets with an overhead crane. A drum clamp attachment is helpful for transferring heavy drums from one place to another without having to make use of a pallet. Forklift mounted hoppers allow materials to be transferred and dumped without having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are even accessories available which can transform the lift truck right into a commercial mop or broom. Such accessories are ideal for cleaning boat docks, warehouse flooring and parking areas. Forklift mounted platforms come geared up with dual entry doors and can be attached to transport workers from one site to another. The mounted platform accessory is nice for reaching parts which can be hard to access, specifically when you've got products or stuff stored in out of the way locations or way up high.

It is a handy alternative to install lift truck accessories which could instantly transform a lift truck right into a mobile crane unit. This equipment is extremely useful in terms of moving loads which could be uneven or tricky. This attachment can either be telescopic, mounted on the carriage itself, or be attached or lift truck mounted.
